

Counter Craft

Security you don't expect.

Cyber Deception Platform

Illusion

Reality

Control the reality your adversaries see.

CounterCraft empowers organizations to strengthen their security posture more efficiently than ever before.

The CounterCraft Cyber Deception Platform facilitates threat hunting and early threat detection, accelerates incident response, and significantly reduces security spend.

Our award-winning solution provides detailed insights into lateral movements and enables users to understand their adversaries' motivations and mindset – the intelligence you need for protection against costly breaches.

A differentiated solution

HIGH-END DECEPTION

Advance your threat hunting capabilities

MORE THAN DETECTION

Accelerate incident response earlier in the attack life cycle

BROAD COUNTERINTELLIGENCE SCOPE

Deploy highly-credible deception campaigns

Cyber Deception Platform

The CounterCraft Cyber Deception Platform protects large enterprises with threat data about adversaries generated directly from their own deception networks.

The platform uses advanced technology to automate complex deception campaigns and lure attackers into controlled synthetic environments. These campaigns equip security teams with powerful insights to aid threat hunting and significantly accelerate incident response.

The CounterCraft Cyber Deception Platform offers a new kind of detection capability, delivering real-time alerts and returning almost zero false positives.

A complete and customizable range of digital assets, strong visualization, reporting and analytics, coupled with an advanced API suite, provides a powerful and flexible deception solution.
